**DETAILED ACTION**

***Drawings***

1. The drawings were received on 5/15/09. These drawings are acceptable.

***Response to Amendment***

2. The amendments to the claims and the abstract of the specification, in the submission dated 5/15/09, are acknowledged and accepted.

***Claim Objections***

3. Claim 1 is objected to because of the following informalities: claim 1 recites "for us in the frequency basis" instead of "for use in the frequency basis." For purposes of examination the limitation will be interpreted to mean "for use in the frequency basis." Appropriate correction is required.
4. Claim 9 is objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot be multiply dependent on the same claim. See MPEP § 608.01(n). Accordingly, the claim has not been further treated on the merits. Claim 10 is dependent on claim 9 and inherits at least the same deficiencies as claim 9.
5. Claim 10 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Claim 10 is dependent on claim 9 which recites a device comprising two frequency beamsplitters one operating in forward and one operating in reverse. Claim 10 requires that only one frequency beamsplitter is used.

***Claim Rejections - 35 USC § 112***

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is problematic because it is unclear whether the "pair of input photons" as recited in line 1 are separated in frequency space at the entrance of the interferometer or if the "pair of input photons" as recited in line 5 are only separated by the time delay element. For purposes of examination the limitations will be interpreted to mean that a pair of input photons are separated in frequency space at the entrance of the interferometer and pass through a time delay element such that the pair of input photons remains separated in frequency space by radio or microwave frequencies. Claims 2-10 are dependent on claim 1 and inherit at least the same deficiencies as claim 1.

Claim 10 is problematic because it is unclear how claim 10 can meet the limitations of both claim 10 and claim 9 on which it depends. Claim 9, as depicted in the embodiment of figure 3, comprises two frequency beam splitters. In contrast claim 10, as depicted in figure 4, is an embodiment comprising a single frequency beam splitter.

***Allowable Subject Matter***

8. Claims 1-10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

***Conclusion***

9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
